

Job Center 2.2.68 Update
Release Notes
March 14, 2013

Overview
=====

This wizard will update Job Center to version 2.2.68.

This is a cumulative update. It includes all updates made available since the release of version 2.2.38. It is not necessary to install earlier patches or service packs. Please note that files removed or replaced during installation will not be archived. To revert to an earlier state Job Center Server must be re-installed.

This update may be applied to any of the following installation profiles:

- Job Center Server

The installer will perform a system check, and will not proceed unless the following conditions are true:

1. The detected installation profile must match one of the profiles above
2. The detected version must be 2.2.42 or later
3. The current user must have local administrative privileges
4. All web browsers must be closed
5. All Job Center Applications must be closed

Important
=====

On the server where Job Center Server was originally installed:

- a) Login with administrative privileges
- b) Double-click on update.exe

Job Center Client will be auto-updated upon re-launch after the server has been updated. The client will check the server for version number and auto-update on its own.

Changes
=====
